

Inch Loss Body Contour Wrap

“The sensible choice in Body Wrap Systems”

- Clinically tested
- Extensive researched
- Aromatherapy based
- Long term results

Introduction

Need to lose a few inches? The Strictly Professional Body Contour Wrap is an inch loss treatment which also improves the appearance of skin tone and cellulite.

Using a unique blend of essential oils and the traditional method of bandages compression, the treatment removes toxins from the fatty tissue and creates a loss of inches around the body contours. The results could mean that you drop a dress size

If the surface of the skin is bumpy and uneven from cellulite, the contour wrap will smooth out the skin's surface and dramatically improve its appearance. This can be a great confidence booster for you to show off your legs in the summer!

How long do the results last?

This is up to you. If you follow the after care advice given to you from your therapist, the inch loss can last up to 28 days!

The quicker you put the toxins back into your diet, the quicker the inches creep back on. Healthy eating will result in a longer lasting inch loss. It is a myth if you have a glass of water after the treatment, you put the inches back on!

What to expect during your treatment

- Expect to wear a bikini so the treatment can be applied to the whole body.
- Expect that you may not be able to have the treatment due to contra indications – please consult your therapist before booking.
- Expect to follow strict after care advice at home and after the treatment.
- Prepare to be wrapped in bandages and to relax for one hour.
- Please shower before coming to the salon for this treatment.

The After Care Advice & Maintenance Advice

After care advice

After just one treatment you will feel the difference and have enjoyed the experience. As the contour wrap is an Aromatherapy based treatment, it is important that you follow the after care advice given to help maintain results.

- No heat treatments should be taken for at least 12 to 24 hours
- Keep warm after the treatment but avoid exposure to direct heat
- No alcohol within 24 hours after treatment
- Drink approximately 1 litre of water a day

Maintenance advice

A course of 6-10 contour wrap treatments is recommended. The more frequent the treatments the more effective the long term results will be.
